

QC ECOSOY SYSTEM

THE ECO-FRIENDLY ALTERNATIVE CONCRETE STAIN AND SEALER SYSTEM

QC ECOSOY SYSTEM is an innovative bio-based decorative concrete staining system made from environmentally friendly, rapidly renewable resource materials. Using soy technology, QC ECOSOY SYSTEM offers a low cost, non-hazardous alternative for stains and sealers without compromising the beautiful look and high quality finish of your decorative concrete project. QC ECOSOY SYSTEM is green-building LEED compliant and available in 15 standard colors.

QC ECOSOY SYSTEM Features and Benefits:

- Uses bio-based soy technology for a rapidly renewable resource
- Ultra-low VOC, non-hazardous, acid free, virtually odorless
- Mildew resistant, UV-resistant, efflorescence-resistant, stain and water resistant
- Use for interior and exterior surfaces with 15 standard colors to choose from
- True penetrating stain creating natural color variations

PRODUCT SYSTEM: QC ECOSOY SYSTEM comes in a diverse color palette for unlimited designs on concrete floors, overlays, masonry walls, natural stone, landscapes, hardscapes, pool decks, patios, garage floors, tilt-up walls, plaster walls, adobe, stucco, drywall, concrete art and more.

QC ECOSOY SYSTEM creates the look of variegated acid stain and provides durable and sustainable colored concrete. QC ECOSOY STAIN is mildew resistant, UV-resistant, efflorescence-resistant, stain resistant and will not peel, chip or flake. QC ECOSOY SEAL will ensure the long lasting protection and enhance the color of the final project (available in gloss or satin).

PRODUCT NOTES:

■ QC ECOSOY STAIN is a semi-transparent, non-hazardous, soy oil modified concrete staining product free of acid and with ultra-low VOC, available in preblended 2 oz. samples, 1- and 5-gallon systems, in 15 standard colors.

■ QC ECOSOY STAIN coverage rates range from 400-600 square feet per gallon. Actual coverage rates may vary depending on the texture, porosity and condition of the concrete, application method, and the local conditions. QC ECOSOY SEAL coverage rates range from 300-400 square feet per gallon.

■ QC ECOSOY SEAL is a water-based, low VOC, environmentally friendly acrylic modified soy sealer, available in 1-, 5-, and 55-gallon units, gloss or satin finish.

■ QC ECOSOY SEAL is the recommended sealer for QC ECOSOY STAIN as a base coat sealer. For interior applications, the system consist of two coats of QC ECOSOY SEAL (gloss or satin), followed by three coats of either QC INTERIOR FLOOR FINISH* gloss or QC NATURAL BEAUTY* matte.

PRODUCT LIMITATIONS:

■ QC ECOSOY STAIN is a semi-transparent concrete stain that will provide a variegated, semi-translucent appearance. The final color and the level of translucence will vary depending on the varying conditions of the concrete substrate to which it is applied. The color chart provides a general representation of the final color and is not intended to be an exact representation of the final color. We strongly recommend that a sample be applied and reviewed for color and degree of translucence prior to any broader application of QC ECOSOY STAIN.

■ High humidity or cool temperatures will slow the dry times for both QC ECOSOY STAIN and QC ECOSOY SEAL.

■ Assure QC ECOSOY STAIN is thoroughly dry before applying QC ECOSOY SEAL. QC ECOSOY SEAL will not bond properly if QC ECOSOY STAIN is still wet, or the surface is not thoroughly dry. Surface temperature, air temperature, and humidity can all slow the dry times.

■ Surface temperature must be above 50 °F and rising or below 90 °F. Avoid application in direct hot sunlight, windy conditions, or high air temperatures.
